

SAR MISSION BRIEF

Search and Rescue Mission Operations Brief

1. Mission Overview

This mission brief provides a structured overview of a Search and Rescue (SAR) operation. It is designed to help the operations team quickly understand the incident, available information, risks, resources, and recommended actions.

2. Incident Information

Field	Information
Mission Type	Search and Rescue
Status	Active
Priority	High
Location	Marine / Coastal Area
Incident Source	Operational Alert
Primary Objective	Locate and assist persons or vessels in distress

3. Environmental Conditions

Parameter	Value	Risk / Observation
Wave Height	1.4 m	Moderate sea condition
Wind Speed	18 km/h	Monitor continuously
Fishing Zone	14 km offshore	Relevant activity area
Overall Risk	MODERATE	Operational caution required

4. Risk Assessment

Risk Level: MODERATE

Current environmental information indicates moderate operational risk. Teams should continuously monitor wind, wave conditions, vessel movement, and any new intelligence received during the mission.

5. Mission Objectives

- Identify the probable location of the person or vessel in distress.
- Collect and verify available incident information.
- Monitor environmental and marine conditions.
- Coordinate search resources and response teams.
- Maintain communication with all participating units.
- Record evidence and operational updates.
- Provide assistance once the target is located.

6. Available Evidence

Evidence Source	Status
Incident Information	Available
Environmental Data	Available
Marine Map	Available
Operational Updates	Live / To be monitored

7. Recommended Operational Actions

- Review the latest incident information before deployment.
- Check the marine map and identify the relevant search area.
- Monitor weather and sea conditions throughout the operation.
- Coordinate search units through the command center.
- Keep an updated record of observations and evidence.
- Escalate the mission if environmental or operational risk increases.

8. Command Center

The Command Center provides a centralized operational view containing the active mission panel, marine map, evidence, environmental information, and mission status. Operators can use this information to coordinate response activities and maintain situational awareness.

9. Mission Status

Component	Status
Mission	ACTIVE
Risk	MODERATE
Wave	1.4 m
Wind	18 km/h
PFZ	14 km offshore
Evidence	Available
Map	Available
